Logic Manager™ Manage Tomorrow's Surprises Today™

Product Overview

LogicManager creates the structure so information across business silos and multiple levels is connected, easily accessible, and actionable. The result: LogicManager's software and advice makes risk management an integral part of your organization's business processes and daily activities.

Taxonomy – Manage the connections between risks, activities, and the goals they impact.

Complete Risk Management – Identify, assess, evaluate, mitigate, and monitor all of your organization's risks on a common platform.

Intuitive Dashboards and Reports – Navigate your risk information and group views for different stakeholders all pre-built for your use on day one.

Workflow, Tasks, Notifications & Documents – Get the right people involved with all your information in one place, turning you a into a value added advisor.

Integration – LogicManager easily integrates with your existing commercial and custom software

Expert Mentoring – Eight sessions included to ensure your organization is on the right path to ERM success

Reporting

With LogicManager, present dashboards that:

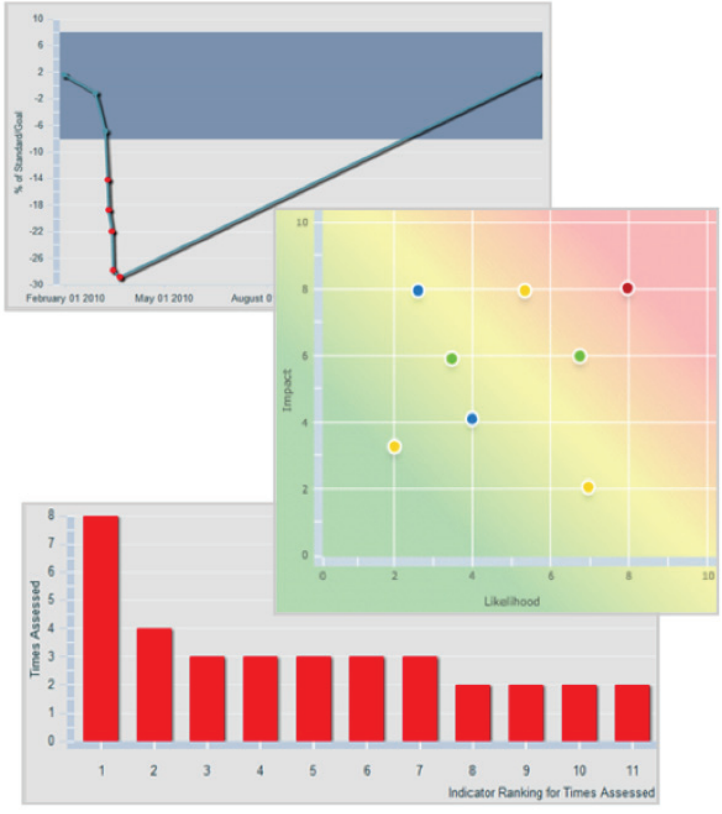

Prioritize – Heatmaps that show which business processes and which risks need action.

Drill Down and roll-up – roll-up assessments across the organization on any subject for a holistic view, and drill down to the processes affecting that subject

Display Trends over Time – Crease views on any subject and measure it's performance over time.

Serve a Variety of Stakeholders – Re-group risks to meet the requirements of different stakeholders without repeating the work.

Reveal Systemic Risks – Track the location and number of times the same risk is independently assessed to see their cumulative strategic impact.

Logic Manager™ Manage Tomorrow's Surprises Today™

Solutions

LogicManager enables you to clearly see an accurate risk profile on each strategic goal. You can measure trends over time on your risk information with business metrics on your operations rolled-up across silos and levels into a holistic index, right at your finger-tips. You get the pulse on your strategic imperatives when things change, and can drill down to the underlying processes driving the change thus giving you your competitive advantage; the ability to drive business performance by knowing what action to take before a loss materializes or a goal is impacted.

One Shared ERM Infrastructure can address:

- Strategic Planning
- Financial Reporting (SOX)
- Vendor Management
- Operations
- CFO Flash Reports
- Business Continuity
- Compliance & Ethics
- Internal Audit
- Information Technology

Who We Serve

LogicManager is proven effective in the following industries:

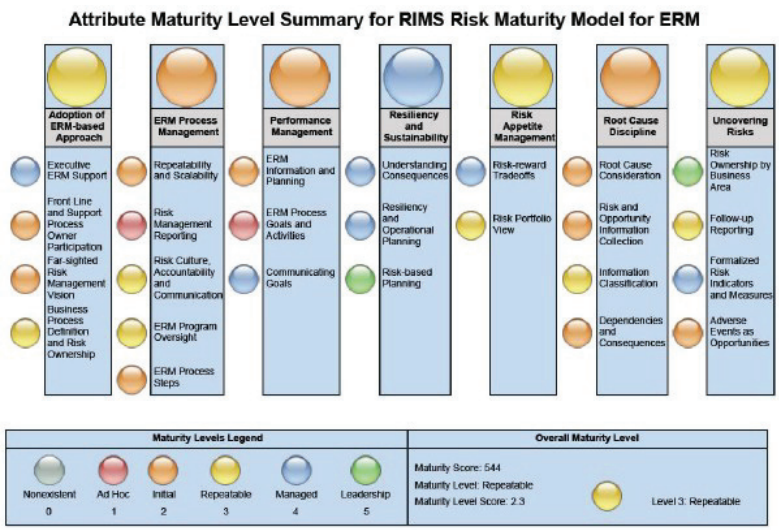

- Financial Services
- Insurance
- Energy
- Healthcare
- Transportation
- Manufacturing

RIMS Risk Maturity Model (RMM)

The RMM provides organizations with the best practices of enterprise risk management (ERM). Using LogicManager's ERM Practitioner's Guide, a companion piece to the RMM, learn exactly how to apply the best practices of the RMM to your organization's unique risk culture.

You can also see where your program compares to others in your industry as well as LogicManager customers.

Go to **logicmanager.com/erm** and receive these ERM best practices today.
